## MESSAGE FROM THE CEO

One of the pillars of Matson's corporate culture has been its long-standing tradition of community involvement. It starts with a desire to improve the communities in which we work and live. Our employees are active in their communities and Matson encourages their participation by magnifying their contributions.

Directed by employee Foundation committees and including matches of employee donations, Matson's community giving reached \$2 million in cash plus in-kind services valued at \$930,000 in 2016—a new high-water mark for our company, and a reflection of our continued growth last year.

This year's *Manifest* provides some insight into Matson's support for more than 700 organizations in Hawaii and Alaska, around the Pacific and on the U.S. mainland last year.

It's also a tribute to the people who make this support possible, highlighting some Matson employees whose leadership in their communities is representative of so many more across our network that embody the giving spirit of Matson.

A handwritten signature in black ink, appearing to read 'MJC', positioned above the printed name and title.

PRESIDENT AND CEO

We care about  
our **Communities**

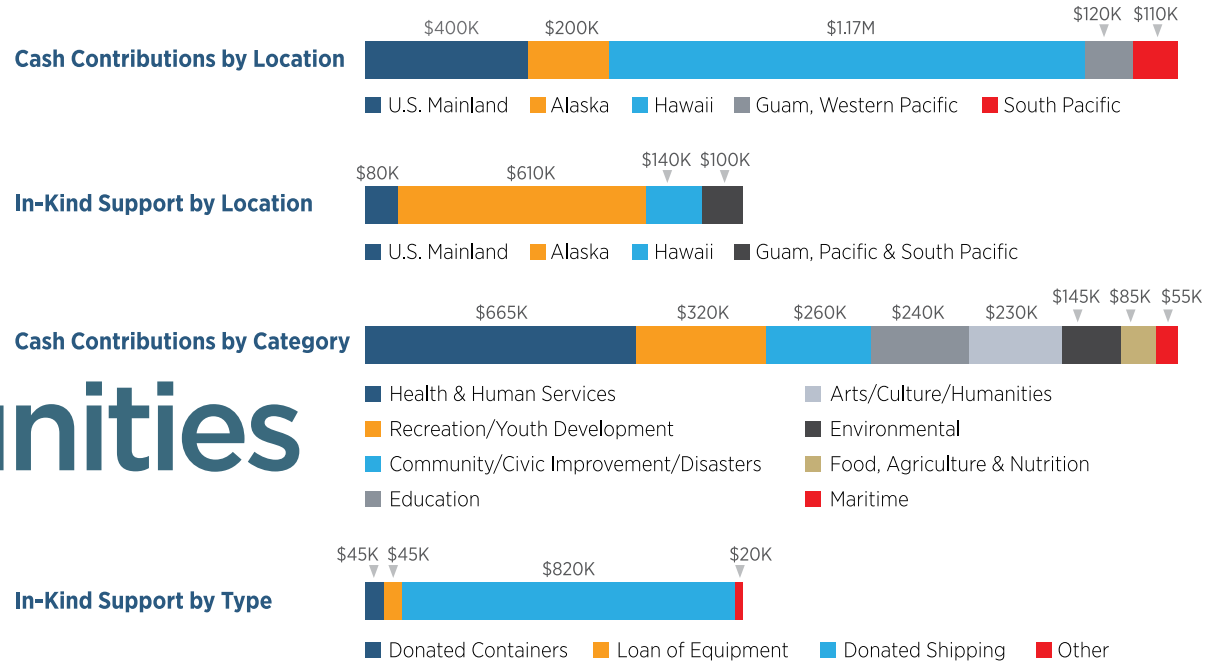

# We support our Communities

Matson's donations in 2016 totaled \$2 million in cash and an additional \$930,000 worth of in-kind services. These figures and the charts on the right include both cash and in-kind support, matching gifts triggered by employee donations, and both Ka Ipu 'Āina and Adahi I Tano' program contributions and costs.

## Community Investment Highlights: 2016

- Major health & human services support is directed to United Ways in our communities, which totaled nearly a quarter of a million dollars this year.
- In-kind support provided in Alaska focused on environmental and nutrition programs, moving recyclables and marine debris out of the state and moving food bank supplies in.
- Ka Ipu 'Āina and Adahi I Tano' programs, documented as recreation/youth development also double as environmental support, cleaning our communities.
- Notable pledges in 2016:
  - Completed \$100,000 in support for the University of Guam;
  - Initiated \$100,000 in support for the A Hui Hou fund with the Maui United Way.

In total, since mid-2012, Matson's support for our communities approaches \$9 million.

## KA IPU 'ĀINA AND ADAHI I TANO' PROGRAMS

**Matson** offers two land-based environmental programs which promote cleanup projects that address littering and dumping, and reduce danger to marine life from debris entering streams and near-shore areas. Non-profit groups coordinate volunteers who conduct approved cleanup projects to receive a cash donation. Matson provides the use of container equipment and pays for related trucking expenses, and for debris disposal fees.

In 2016, Matson donated to 164 non-profits through these two programs; including all related expenses, close to **\$185,000** was allocated to these cleanup efforts.

The Roosevelt High School football team cleaned up Ala Moana Beach Park to help purchase software used by coaches, new equipment and fund an end of season banquet.

**Above:** Charities bring their own enthusiasm—and wear their own apparel—to the cleanups. Honolulu's Gay Mens Chorus assembled in colorful order, in order to capture this pre-cleanup photo. **Below, right:** Red Cross Club members work in pairs. **Bottom:** Radford High School music boosters cleaned Blaisdell Park in order earn funds to purchase new music.

**In Hawaii,** Matson's flagship land-based environmental program, Ka Ipu 'Āina (Container for the Land), marked its fifteenth year in 2016 by partnering with 135 Hawaii charities on four islands—ten-percent more than the year prior and with one third of the organizations being first-time participants. Many of the Oahu cleanups are conducted in partnership with the City & County of Honolulu, improving popular parks and beach parks. Across the state, about eleven cleanups were conducted each month.

**In Guam,** our Adahi I Tano' (Caring for the Land) program also grew by one-third, providing a fundraising opportunity for 29 charities, nearly half of which were new to the program. Groups cleared shorelines, streams and roadsides of both man-made and natural storm debris. Adahi I Tano' has benefited 72 different charities since it began in 2013 and it is coordinated with the Islandwide Beautification Task Force.

**Bernie Valencia**

General Manager,  
Guam & Micronesia  
Region

**Hometown:** Guam

**Years with Matson:** 8

**Charity name:**

Ayuda Foundation delivers medical, human services and development assistance throughout Micronesia.

**Years volunteering for this charity:** 15

**Who asked me to help:** Former Senator Carlotta Leon Guerrero.

**Why I got involved:** When working for Mobil, Ayuda had sought donated diesel fuel for a ship delivering donated cargo to the neighbor islands. It was Carlotta who called.

**Why it's important to me:** My whole career has been working in Micronesia, so I enjoy any opportunity to assist our brothers and sisters, especially after a disaster. I also like that Ayuda is helping young

girls to make good choices in life to help reduce teen pregnancy, suicide, substance and sexual abuse through their 'Island Girl Power' program of role models and project-based learning.

**Why it's important to Matson:** We are genuine about helping people in the communities we serve.

**Other charities:** Special Olympics Guam, iRecycle, iCAN Resources, Navy League, and the USO.

**Fun fact:** We have no snow in Guam, and I love to snowboard!

**The 2016 LeadOn! youth conference,** produced by the Alaska Network on Domestic Violence and Sexual Assault for teens from villages and towns across Alaska, was boosted by a workshop led by Matson-sponsored Iditarod musher Aliy Zirkle. Having completed her sixteenth journey across the thousand mile route, Aliy offered inspiration as a model of endurance, determination and respect for self and others. Matson is working with Aliy and ANDVSA to expand participation in the conference to inspire more youth involvement in their communities.

**BACK COVER:** Iditarod Musher Aliy Zirkle and her team of sled dogs pass the Rocks of Ruby, a settlement of 170 residents on the Yukon River, along the Iditarod Trail. Ruby, a former Gold Rush town, was named for garnets found in their hills that were mistaken for more precious rubies. (Photo: Jeff Schultz)
